## SUMMARY

---

Motivated and skilled MCA (Master of Computer Applications) graduating student eager to leverage theoretical knowledge and practical experience gained through coursework and projects. Proficient in programming languages such as Java, Python, and C++, with a solid understanding of data structures and algorithms. Possesses strong analytical and problem-solving abilities, coupled with excellent communication skills. Committed to continuous learning and staying updated with the latest technologies in the field of computer science. Seeking an opportunity to contribute positively to a dynamic team and grow professionally in the software development industry.

## PROJECT

---

**Collaborative XpertiseHub** | MCA - Bengalore Mar 2024

- The Collaborative Expertise Platform aims to create a collaborative environment where users can share their expertise and knowledge with others in various domains. Built using React Native and Firebase, this platform allows users to connect, collaborate, and learn from each other seamlessly.

**Courier Management System (CMS)** | MCA - Bengalore Aug 2023

- The Courier Management System (CMS) is a comprehensive web-based application developed using PHP that streamlines the process of managing courier services. This system provides a centralized platform for courier companies to efficiently handle tasks related to booking, tracking, and delivering shipments.

**Gesture-Controlled Presentation Assistant** | BCA - Bengalore Sep 2022

- The Gesture-Controlled Presentation Assistant is a Python-based application designed to help teachers and academicians focus on their presentations by allowing them to control slides using predefined hand gestures. Leveraging technologies such as Mediapipe and OpenCV, this application detects hand gestures in real-time and triggers actions to navigate through presentation slides seamlessly. Additionally, the application can be controlled using simple Bash commands for ease of use.

**FiveM GTA5 Server Setup (TKRP)** | EX-DEVELOPER 2020

- The FiveM GTA5 Server Setup Project aims to create a custom multiplayer gaming experience by setting up a dedicated server for Grand Theft Auto V (GTA5) using the FiveM platform. This project involves configuring the server environment, installing necessary dependencies, customizing server settings, and deploying modifications (mods) to create unique gameplay features.

## SKILLS SUMMARY

---

- HTML/CSS
- C
- React
- Php
- Java
- Unity
- AWS-Cloud
- JavaScript
- C++
- React-Native
- SQL
- Python
- lua

## CERTIFICATIONS

---

**The Complete Python Developer** | U demy

**The Game Design and AI Master Class Beginner to Expert** | U demy

## EDUCATION

---

**Master of Computer Application** Expected Sep 2024

MS RAMAIAH INSTITUTE OF TECHNOLOGY, Bengalore, Karanataka, Indiaa CGPA: 7.00

**Bachelors of Computer Application** Sep 2022

MS RAMAIAH COLLEGE OF ATRS SCIENCE AND COMMERCE, Bengalore, Karanataka, India CGPA: 7.54

**Preuniversity**

May 2019

OLIVE PUBLIC SCHOOL PERAMBRA, Kozhikode, Kerala, India

science - Biology

CGPA: 5.56

**School**

Apr 2017
